EDUCATION

Medicaps University, Indore, India
B.Tech. in Computer Science & Engineering

Aug 2022 – May 2026
CGPA: 7.63/10

EXPERIENCE

Data Science Intern, Suzlon Group

Jun 2025 – Aug 2025

- Processed and analyzed over 1 million industrial sensor records through data cleaning, preprocessing, and exploratory data analysis.
- Developed and evaluated machine learning models for gearbox failure prediction using Python, feature engineering, and performance metrics including R^2 , MAE, and RMSE.
- Created visualizations using Matplotlib and Seaborn to identify operational trends and anomalies and used SQL to query large datasets.
- Collaborated with industry professionals to translate analytical findings into actionable maintenance insights.

Student Placement Coordinator, Medicaps University

Aug 2024 – Apr 2026

- Coordinated placement activities for 1000+ students, collaborated with 40+ recruiters, and assisted students through mock interviews and placement readiness initiatives.

PROJECTS

Bookshelf Scanner – AI-Powered Book Recognition App

Nov 2025 – Dec 2025

React, Vite, TypeScript, Node.js, Express, PostgreSQL, Prisma, OpenAI GPT-4o Vision

- Built a full-stack AI app to scan bookshelf images, detect book titles using OpenAI GPT-4o Vision, and generate personalized recommendations from Goodreads history.
- Designed a REST API with Express and TypeScript, and used Prisma ORM with PostgreSQL to manage scan history and user preferences.

Fake News Classification System

Jan 2026 – Feb 2026

Machine Learning, Natural Language Processing (NLP), TF-IDF, Logistic Regression, DistilBERT

- Built an end-to-end fake news classification backend using TF-IDF, Logistic Regression, SVM, and DistilBERT. Designed a confidence-aware ensemble to mitigate dataset bias and transformer overconfidence, and exposed predictions via a FastAPI REST API.
- Evaluated multiple machine learning and transformer-based approaches, achieving high classification accuracy while balancing model confidence and generalization performance.

DevOverflow – Full-Stack Q&A Platform

Mar 2025 – Apr 2025

Next.js 15, React, Tailwind CSS, shadcn/ui, MongoDB, NextAuth, Node.js

- Built a StackOverflow-like Q&A platform with AI-powered suggestions, secure authentication, gamification, and advanced search.
- Implemented user interaction features including voting, bookmarking, and reputation-based engagement mechanisms to improve platform usability.

PUBLICATIONS

Analysis of Medical Images (MRI, CT Scans) for Early Detection of Abnormalities

Apr 2024

RIET-IJSET Vol. 12, Issue 2 - Co-author. Investigated machine learning techniques for medical image analysis using transfer learning architectures including ResNet and VGG for abnormality detection.

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, SQL

Frontend: React, Next.js, Tailwind CSS, GSAP, shadcn/ui

Backend/DB: Node.js, Express.js, FastAPI, MongoDB, PostgreSQL, Prisma

ML/Data: Scikit-learn, XGBoost, Matplotlib, Seaborn, Random Forest, TF-IDF, DistilBERT, Pandas, NumPy, NLP

Analysis: EDA, Feature Engineering, Visualization, Model Evaluation

Tools: Git, Postman, Jupyter Notebook, Vercel
